2. Description

The OR-50L are optical coupled isolators containing a GaAlAs LED on the input side and a PIN photodiode and a high-speed amplifier transistor on the output side on one chip. Designed specifically for high supply voltage and high common mode transient immunity (CMR). They are in 6-pin plastic SDIP (Shrink Dual In-line Package). The OR-50L has 8 mm creepage distance and is half size of 8-pin DIP.

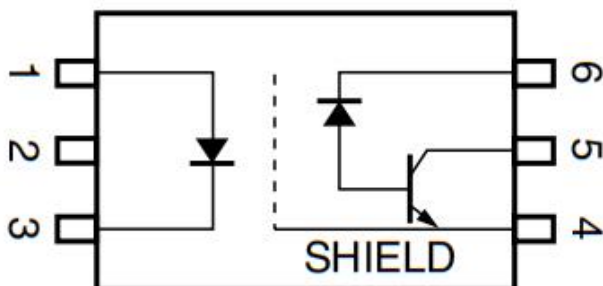

The OR-50LW is lead bending type for long creepage distance (Gull-wing) for surface mount.

The OR-50LW1 is lead bending type (Gull-wing) for surface mounting.
